Texas Hybrids
8 great numbers

Texas

NO. 26 A Double-cross Yellow Hybrid. An outstanding corn. All four inbred strains developed from native Texas varieties. A very good yielder—makes 20% to 35% more—matures early, being one of the earliest of the Hybrids. Nice size ears with yellow dent type large grains of yellow color. Very high shell-out. Similar to No. 18. Good shuck cover—more insect resistant. Strong sturdy stalk and excellent root system. Drought resistant. Adapted to all corn-growing regions of the state. Try this number—you'll like it!

Texas

NO. 28 Another Double-cross Yellow Hybrid. A really fine corn. Contains Yellow Surcrotter inbreds making it similar to No. 8. Has wide range of adaptability and will give heavy yields in all corn-growing areas of the State. Produces large ears and large grain of good yellow color. Matures Early. Has fine shuck protection and is therefore more resistant to earworms and weevils. Drought resistant heavy stalk and fine root system. Increases yields 20% to 35% over ordinary corns. Get some of this good Hybrid!

Texas

NO. 30 This is a Double-cross Yellow Hybrid giving an excellent performance in the field. It has a grand pedigree of four great inbred strains. Widely adapted to all types of corn growing soils and gives increased yields ranging up to 35% and often more over ordinary corns. Has nice, large ears with deep golden grain. This corn has good root system, stout stalk that stands up well, and is highly resistant to root lodging. Early maturing. Be sure to plant some of this number the coming season.

Texas

NO. 32 This is a new Double-cross Yellow Hybrid consisting of a combination of four outstanding inbred lines. Well adapted to the various types of corn growing lands and under average normal conditions increased yields up to 35% or more over ordinary corns can often be obtained—Produces nice ears of deep golden grain, has good shuck cover and sturdy stalk with excellent root system—Matures early and is drought resistant—Plant some of this along with your other favorite numbers.

Texas

NO. 34 One of the Newest Yellow Hybrids—Particularly adapted to the coastal areas—excellent shuck cover—resistant to insects, earworms and diseases—tall vigorous plants that stand well—greater vegetative growth makes it a wonderful silage corn—long cylindrical ears of high quality grain—good yields in areas of high humidity and rainfall.

Texas

NO. 36 A new early double-cross yellow hybrid—more heat and drought tolerant—heavy, sturdy, slightly shorter stalks with good standability—matures early and has good shuck cover—gives increased yields up to 35% more—shelling percentage very good—nice ears with grain of good yellow color—widely adapted—Plant some—you'll like it.

Texas

NO. 38 A brand new yellow double-cross hybrid—extra early maturing frequently escapes heat and drought due to early maturity—has low ear placement and plant is slightly shorter—recommended for droughty areas and where early maturity is desired—very resistant to root lodging and stalk breaking—dependable yields—good resistance to insects and earworms—This is a special purpose hybrid where quick maturity is of value.

Texas

NO. 17W Here is the Newest Double-cross White Hybrid composed of four fine inbred strains. A quick maturing exceptionally drought resistant corn especially adapted to the drier areas of the State but does well on all corn growing soils. Good root system, stands well and has stout, sturdy stalk. Nice size ear with large flat grains well set on cob. Makes heavy yields up to 35% more than ordinary corns under normal conditions. Be sure and get some of this brand new White for your next planting.

STATE REGISTERED PLANT BREEDERS AND PRODUCERS

MARTINDALE, TEXAS

1961-62 Season

Dear Customer Friend:

In the crop year ahead every grower will surely be vitally interested in making the most from his planted acres. Good planting seed are of first importance. Plan now to use the best. Our top-quality strains of hybrid corn, sorghum and cotton are well-suited to your soil and are bred to give bigger yields insuring greater net profits per acre. Many farmers are switching to BAGLEY SEEDS every year and getting in on those extra profits.

Favorable growing and harvesting conditions prevailed here on our breeding farms during the 1961 crop year and we have excellent stocks of the different numbers of our Hybrid Seed Corn, Hybrid Sorghum, Gold-Tex Sorghum and Pedigreed Cottonseed. These are well-matured seed of uniform good quality backed by years of scientific breeding experience. All seed are expertly grown, properly handled, thoroughly processed and carefully treated to give top field performance and greater dollars-per-acre returns.

Enclosed please find folder which lists and describes our seed. Very likely some of our strains will be booked up early so we are urging all our friends to place their orders with us NOW if they have not already done so. We will be glad to receive your order direct or see our nearest dealer and book your needs with him. Handy order form with price list on back side is enclosed. We are always happy to serve you and thank you sincerely for past business.

Very truly yours,

W. W. BAGLEY & SONS

PEDIGREED
COTTON SEED

IT PAYS TO PLANT SEED OF RECOGNIZED QUALITY

4 GREAT STRAINS

BAGLEY *Cotton*

Bred to suit your land... Texas' Finest!

BAGLEY'S NEWEST . . . *Storm-Tex*
PULLER-STRIPPER COTTON

Bagley *Storm-Tex* 157 Cotton

Newest of the New—An outstanding strain developed and produced on Bagley's experimental seed farms is now being released in very limited quantity. This cotton has given an excellent performance in tests plots and increase plantings. Designed to meet the present cotton production needs, it is a PULLER-STRIPPER COTTON with GOOD STORM RESISTANT QUALITIES. It has big bolls (about 55 bolls make pound of seed cotton), locks are tight in bur, lint turn-out about 38 to 40%, has good strong, uniform 15/16 to 1-1/32 inch staple, and is drought resistant. A good combination that will make you more cotton profits —Supply of this seed is very limited so we suggest you ORDER EARLY!

Bagley 64 Master Strain

Newest of the Bagley Master Strain Cottons. Suited to upland, flat and bottom land. Grows off fast, fruits heavily, matures early. Strong, sturdy stalk with short-jointed fruiting branches and light foliage. Majority 5-lock easy-to-pick bolls. A good snapping cotton. 50 to 60 bolls per pound seed cotton. Deep root system—drought resistant. Gin turn-out of 39% to 41% and excellent staple of 31/32 to 1-1/32 inch according to soil and season. High in varietal purity. You'll enjoy growing this new, different, better cotton!

Bagley B-17 Royal Rowden

Best yielding Rowden type. Well adapted to wide range of soils and climate suited to cotton growing. Comes up and grows off fast. Matures early. Strong stalk with well-spaced fruiting branches. Big, fluffy bolls (50 to 60 per lb. seed cotton) that are easily picked or snapped. Light foliage. Good tap and lateral roots—drought resistant. Lint turn-out 37% to 40% and hard, strong, uniform 31/32 to 1-1/16 inch staple depending on soil and season. A truly good cotton—try it!

Bagley 793 Master Strain

A well balanced, high yielding cotton. Adapted to wide range of growing conditions—suited to most all cotton growing soils. Fruits fast—matures early. Big bolls that pick or snap easily. Deep root system—drought resistant. Sturdy stalk. Medium foliage. Strong, uniform 15/16 to 1-1/32 inch staple and gin turn-out of 39% to 41% dependent on soil and season. A good field performer—grow some!
